

write a program which creates two threads one thread "BMS College of Engineering" once every 10 seconds & another displaying "CSE" once every two seconds.

```
class NewThread implements Runnable {
    private String name;
    private int interval;
    private Thread t;
```

```
NewThread (String threadname, int interval) {
    this.name = threadname;
    this.interval = interval;
    t = new Thread (this, name);
    t.start ();
}
```

```
public void run() {
    int i=1, n=5;
    try {
        while (i <= n) {
            System.out.println ("Thread:" +
                                this.name);
            i++;
            Thread.sleep (this.interval);
        }
    }
    catch (InterruptedException e) {
        System.out.println (name + "Interrupted");
    }
}
```

```

class MultiThread {
    public static void main (String args[]) {
        new Thread ("BMSCE", 10000);
        new Thread ("CSE", 20000);
    }
}

```
